Remediation Action Details

Finding ID	Finding Summary	Severity	Action Owner	Target Date	Status	Progress %	
	Confirmed encryption status. The monthly compliance review was not signed off.						
F-015	Four evidence packages were incomplete, three had no reviewer sign-off, and two were stored outside the central repository. Follow-up on missing evidence was informal.	Medium	IT Manager / Operations Manager	2026-10-14	In Progress		25%
F-009	Seven high-severity patches exceeded the approved timeline. Three overdue items had no documented exception or remediation owner.	High	IT Manager	2026-09-14	Completed		100%
F-014	The register was complete, but three treatment actions were overdue and two risk records had not been updated within the monthly review cycle. Meeting evidence showed limited discussion of overdue actions.	Medium	Senior Management / IT Manager	2026-10-09	Completed		100%

Risk Summary

Risk ID	Asset / Process	Risk Category	Inherent Risk Rating	Risk Owner	Status
R-001	Microsoft 365	Access Control	Critical	IT Manager	Open

Risk and Control Context

Risk ID	Risk Description	Business Impact	Existing Control	Control Gap	Treatment Plan
R-001	MFA is not enforced for all users, which could allow attackers to access accounts if passwords are stolen or phished.	Unauthorized access to email, SharePoint files, internal communications, and user accounts.	MFA is enabled for some admin accounts.	MFA is not required for all users, and exceptions are not formally reviewed.	Enforce MFA for all users and review exceptions every month.

Control Testing Result

Risk ID	Control ID	Control Area	Design Effectiveness	Operating Effectiveness	Overall Conclusion	Exceptions	Severity
R-001	IAM-01	Microsoft 365	Partially Effective	Ineffective	Needs Improvement	3	High

Finding and Remediation Response

Risk ID	Finding ID	Finding Summary	Severity	Retest Required	Management Action	Action Owner	Target Date	Progress %	Evidence Status	Final Disposition
R-001	F-001	Twelve active accounts were not registered for MFA. Three excluded accounts had no expiry date, and approval evidence was incomplete. No monthly exception review was available.	High	Yes	Enable MFA for the affected accounts, document all exclusions, assign expiry dates, and complete a monthly exception review.	IT Manager	2026-08-05	55%	Pending	Open
